

365 Retail Markets

PicoCooler Vision + Ambient AI Smart Cooler

Overview

The PicoCooler Vision with Ambient Cabinet, by 365 Retail Markets, gives operators a flexible way to expand their micro market footprint, providing a secure, AI-powered solution that supports both refrigerated and ambient products within one cohesive self-service experience.

Its high-capacity, dual-zone design accommodates a wide variety of fresh meals, snacks, beverages, and pantry items easily tailored to each location's needs. Customers can purchase both refrigerated and ambient products in one transaction, creating a fast grab-and-go experience that encourages impulse buys and increases transaction values.

Advanced AI-driven product recognition accurately identifies items as they're selected, supporting a fast, accurate checkout without the need for scanning. Featuring controlled, payment-activated access, the cabinets remain locked until a cashless payment is pre-authorized.

Its patent-pending modular design allows operators to link multiple Ambient Cabinets to a single PicoCooler Vision payment terminal, increasing product variety without adding additional checkout hardware. This makes it easy to scale, customize layouts, or upgrade a location.

The PicoCooler Vision with Ambient Cabinet is built for high-traffic and unattended locations, from office breakrooms and campuses to hotels and public spaces. Inventory, sales, and users can easily be managed via ADM.

By offering a wider variety of products, better security, and a frictionless shopping experience, this system helps operators expand into new markets and serve more customers, while boosting their bottom line. It's a powerful, flexible upgrade for anyone looking to modernize their micro market offerings.

Product Specs
